Strotexstal steel gutter system diagram.

The only system with 2 solutions (with or without couplings) available on the market.

1 END CAP

It is easy to install without the use of glue or tin. EPDM rubber seals the gutter tip perfectly and is UV resistant.

2 GUTTER WITH A PROTECTIVE FILM

Each part of the system is produced with high precision and attention to details, which guarantees an excellent drainage of rainwater from the roof.

3 SIMPLE OVER-RAFTER HOOK

A pressed hook with a recess which strengthens its structure.

4 FASTENING HOOK WITH A PLATE OR TONGUE

It is used to attach roof gutters to the fascia board.

5 TEE

The tee is used to connect two outlets of the roof slope in order to reduce the number of downpipes.

6 CONNECTOR/GLUE

Easily connecting two gutters without the need of soldering. Enables the gutter to move with temperature changes.

7 ELBOW

Connects the outlet / drain funnel to the downpipe, and also serving as spout attachable to the end of the downpipe.

8 EMBOSSED GUTTER CORNER

An element of the system that connects two gutters in the outer / inner corner of the building roof.

9 OUTLET / DRAINAGE

Suspended Foliarex Foroof drain - outlet / drain funnel guarantees safe water drainage and simple installation without additional fastening elements.

10 DOWNPIPES

Due to the high precision production process, the folded downpipe connects smoothly with other elements of Strotex system.

11 RAIN WATER CATCHER

The rainwater catcher with a leaf netting, equipped with a door handle makes it easy to open and close the cover. This gives us easy drainage of rainwater and maintains its aesthetic value.

12 SCREWED CLAMPS

Clamps attaching the pipe.

13 COUPLING

A necessary element for the installation of the roof drainage system that bonds the downpipe.

14 SCREW FOR CLAMP

Sizes: 100, 120, 160, 200, 240, 260, 280, 300

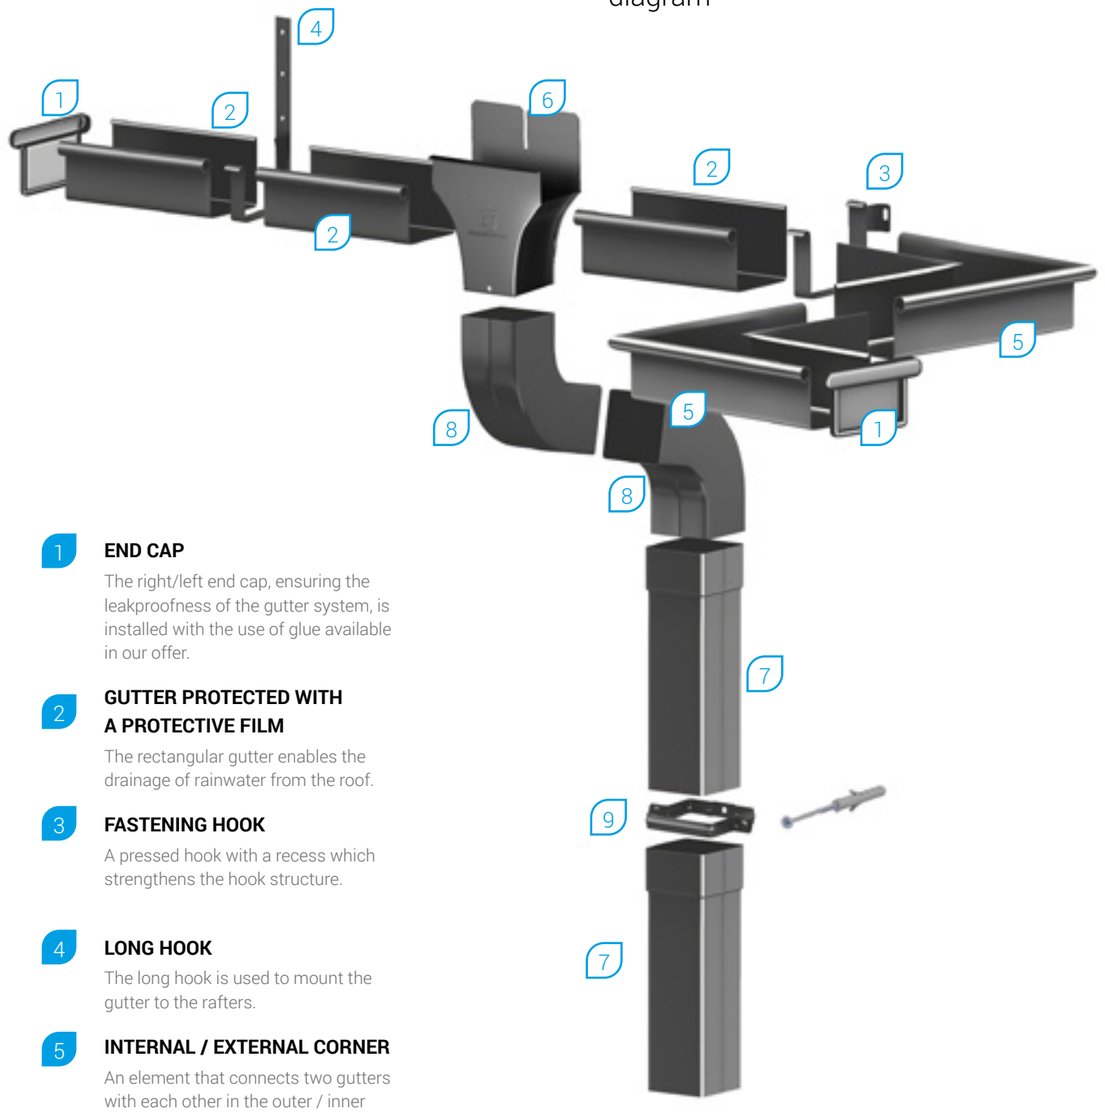
** 2 hooks are used for 1 meter of the gutter

There are two possible methods of assembling the gutter system: using either a connector or a roofing adhesive sealant.

Details of the offer available on www.foliarexforoof.com.pl

SquareLine steel gutter system diagram



1 END CAP

The right/left end cap, ensuring the leakproofness of the gutter system, is installed with the use of glue available in our offer.

2 GUTTER PROTECTED WITH A PROTECTIVE FILM

The rectangular gutter enables the drainage of rainwater from the roof.

3 FASTENING HOOK

A pressed hook with a recess which strengthens the hook structure.

4 LONG HOOK

The long hook is used to mount the gutter to the rafters.

5 INTERNAL / EXTERNAL CORNER

An element that connects two gutters with each other in the outer / inner corner of the building roof.

6 OUTLET/DRAINAGE

It guarantees safe drainage of water. No additional fixing elements are required for assembly.

7 DRAINPIPE

Produced with high precision, the downpipe fits perfectly to the rest of the SquareLine system.

8 ELBOW

It is used to connect the outlet/drain funnel with the downpipe, and also acts as a spout, mounted at the end of the downpipe.

9 CLAMP

It is used to attach the downpipe to the building wall.

The STROTEX snow protection system consists of snow fences, pipes, connectors, brackets and snow protectors. It constitutes a snow barrier in the lower part of the roof slope. It prevents the accumulation of excess snow in the guttering, keeping it directly on the roof and protecting the gutter system from damage. The system also eliminates the formation of icicles by gradually releasing water from the retained melting snow
